Prof. Samuel Johnson, of the Michi- red letter Z embr ciag the embleme of out gan Agricultural College, a college that trade, Spitala, Martir and Graduate; also is really agricutural in its scope, gives observe the signature of the following as his idea of the value of casilage, from experiments made there:

I was not at all sanguine when we be the inred na on the s de. TAKE NO OTHER I was not at all sanguine when we began the experiment, as to the decided merits of ensilage as claimed by many writers, but I have been much pleased with the result of the feeding. The convenience in handling the prepared fod der; the large amount that can be stored in a small place; the avidity with which cattle eat it, and thrive and grow which cattle eat it, and thrive and grow even death has ron tel from improper it a when a meal ration is fed with it; the fact meat and from taking unski fully prepare that it can be stored in a wet time, during med clue. lo very weather when fodder could not be cured; the furnishing of succulent to d the counterfer; it is called a trial package during the long winters at small cost- It sate it costs you nothing but it like to have these are some of the reasons that led cost mo my life. Yours, e.e. Jone Griffin. me to think the ensilaging of corn as pecially will prove to be practical and profitable methods of preparing food for stock. I think it may take the place of roo s and be a cheap substitute for them I am disposed to believe that the best results will be secured by f eding one daily ration of dry fodder in connection with ensilage. The experiment shows that it is not a complete food ration. A meal ration adapted to the animal and the desired result, must be fed with it. The last winter was exceptionally favorable for the feeding of fodder of this character, on account of its extreme mildness, the mean temperature being about 28 degress during the time em-braced in the feeding. With severe weather the results might be less favor-

Scab in Sheep.

A good renedy for this widespread evil to the flocks is difficult to find. But the lime and sulphur dip, is perhaps as effective as any and cheaper than most. It is made in the proporsixty pounds of sulphur. To this mix-ture, add sixty gallons of water and boil it for fifteen or twenty minutes. This will unite the lime and sulphur and the mixture assumes a deep orange color. Now have a vat arranged through which the sheep can be taken. Ald the orange solution as above prepared to 180 gullons of water, and heat it to about 100 degrees. This makes 8) pounds of lime and sulphur to 240 gailons of water, and is the proportion to follow in preparing any required amount, but a vat full can be used for many sheep. The vat should be deep enough to swim them, and one or one and a half minutes is long enough to keep an animal in it, provided that proper care be taken to use a large sponge on the head, ears and forehead. If this or any similar dip is used three tim's at intervals of a week, it will prove effectual. The only objection to it is that the lime is harsh and has a tendency to injure the wool. To remedy this the addition of four or five pounds of potash to the quantity above mentioned will be useful.

Another dip of value is made by tak ing twenty-five pounds of strong tob c-co, six pounds of potash, and six pounds of lime to 100 gallons of water. Some persons ad I two quarts of tar to the above.-Rural World.

The Tichborne Case.

The main facts of the story are that Roger Tichborne was beir to a baronetcy and estate yielding \$100,000 a year. He entered the army, remained three years, and after visiting South America disappeared, and is supposed to have been lost at sea. His mother, proud and insane, was unwilling that the esta e should fall into the hands of the child of a detested daughter in-law, and accordingly advertised in Australia for the missing beir. Arthur Orton, a batcher and a low adventurer, immediately went to England, and, backed by speculators and accomplices, claimed the estate. The mother was an easy dope, and though the claimant was wonderfally unlike Roger Tichborne, the swindle progressed famously. The O ton was convicted of being a perjur-er. The case occupied thirty-one days in opening, forty-seven in summing up, the Chief Justice took eighteen days in delivering his charge, and the whole case cost over \$1,250,000. It is the most celebrated lawsuit on record.

READ THE TESTIMONIALS:

This is to certify that I have tried Pryor's Pile Contract in a case of piles, and state that is gave more resist than anything I have ever tried. I further state that as a remedy for burns it is unparalleled. I also used it for a case of tester in my feet, of twenter years' standing, and say that it is the first thing that I have ever tried that gave mo more than momentary relief. I consider most that I am chairely relieved from that distressing disease.

Ague Cure

Is a purely vegetable bitter and powerful tonic, and is warranted a speedy and certain cure for Fever and Ague, Chills and Fever, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, and all malarial disorders. In miasmatic districts the special respectively. tricts, the rapid pulse, coated tongue, thirst, lassitude, loss of appetite, pain in the back and loins, and coidness of the spine and extremities, are only premonitions of severer symptoms, which terminate in the ague paroxysm, succeeded by high fever and profuse perspiration. It is a startling fact, that quinine, arse-

nic and other poisonous minerals, form the basis of most of the "Fever and Agno Proparations," "Specifics," "Symps," and "Tonics," in the market. The prepara-tions made from these mineral poisons, although they are palatable, and may break the chill, do not cure, but leave the malarial and their own drag poison in the system, producing quinism, dizziness, ringing in the cars, headache, vertigo, and other disorders more formidable than the disease, they were intended to cure. Aven's Auen Come thoroughly cradientes these noxious poisons from the system, and always cures the severest enses. It contains no quinine, mineral, or any thing contains no quinine, mineral, or any thing that could injure the most delicate patient; and its crowning excellence, above its certainty to cure, is that it leaves the system as free from disease as before the

LEXINGTON, MISSISSIPPL Do you want some showing or a guaranter d ap and have enough members to pay your money at marriage? In presenting this our plan—the only one of the kind—we pr pose to give our members the best, salest and surest of all plans, and we feel assured that all will appear with us agree with us.

WE TAKE ALL THE EISK ON OURSELVES. WE GUARANTEE TO ALL THAT WE WILL HAVE OVER 600 MEMBERS BEFORE 1ST OF JANU We teel confident that we will have 1,000 mem ers by that time.

But should we fail to get as many as we guarantee by said time, then we will refund to each one their advance assessment and annual dues at our expense.

We are determined to reach the number, and a great many more.

The scarcity of mony at this time of year keeps a great many from joining, therefore we have adopted this plan in both our Departments. Applicants will be allowed to draw on the Secretary for the amount of Member ship Fee payable to the Agent, out of the Berefit fund accruing to the Applicant or Ben-ficiary at the maturity of the claim. We

bave made this important change in our first plan because it will enable the farmer boy and a great many others to join.

Members marrying in less time than 20 days can have their annual dues paid out of their benefit by sending Receipt to the Secretary for that amount of the money with the proof marriage.
Each member you get lessens your Assess

All who want to take out policles on their intended without giving her name, can do so by using the words "My Future Wife," and making out the application payable to the For Supplies and information, address, JNO. B. WRIGHT, Sac v. sept.6, 82-4w. Lexington, Miss.

Ex Gov. J. M. STONE PRESIDENT. CHAS. B. HOWRY LEGAL ADVISER. H. M. STREET, VICE PRESIDENT, J. G. HAMILTON, GENERAL AGENT JAMES HAYS, SECRETARY. WIRT JOHNSTON, MED. DIRECTOR.

SAFE, because by Special Act of the Legislature the Safety or Moreovery Fund is deposited in the State Treasury at interest, which fund is only to be drawn on to pay death benefits.

PERMANENT, because the Find so deposited in the State Treasury belongs solely to the members, and each member's interest in this fund is continually increasing, and the security of his hasurance likewise increases.

Thus, the member is impelled by self-interest to continue his payments, as failure to porfeits his interest in the State Treasury deposit to the remaining members.

Other valuable features will be explained by our Agents. Address UNION AID ASSOCIATION, Jackson, Miss.
